

# How to Link Actors with Use Cases

- **This tutorial shows how to link actors with use cases**

# Sequence of actions

- The green label describes the **first action** to do in the current screen capture. 
- The orange labels show the **following** actions. 
- The red label describes the **last action** in the sequence of actions. 

# How to Link Actors with Use Cases

The screenshot displays the Open ModelSphere interface. The Explorer panel on the left shows a project structure with 'Automatic Teller Machine' selected. The Design Panel at the bottom left is empty. The main diagram area shows a UML Use Case Diagram for '0 Automatic Teller Machine'. It includes two actors: 'ATM User' and 'ATM Administrator'. A vertical line connects them, with a dashed arrow pointing from 'ATM Administrator' to 'ATM User'. Three use cases are shown: 'Enter PIN +', 'Choose Operation', and 'Administrate ATM'. A green arrow labeled '1. Select Tool' points to the 'Link Model' icon in the Explorer. A yellow arrow labeled '2. Click Origin' points to the 'ATM User' actor. Another yellow arrow labeled '3. Click Target' points to the 'Enter PIN +' use case. The status bar at the bottom reads: 'Click on the target object to complete the link creation. Click inside the drawing area to add Project project Local'.
