

# How to Change Link Directions

- **This tutorial shows how to change link directions**

# Sequence of actions

- The green label describes the **first action** to do in the current screen capture. 
- The orange labels show the **following** actions. 
- The red label describes the **last action** in the sequence of actions. 

# How to Change Link Directions

The screenshot shows the Open ModelSphere interface with a UML Use Case Diagram titled "2 Choose Operation". The diagram includes an actor "ATM User" and several use cases: "Withdraw Money", "Refuse Withdraw", "Deposit Money", and "Check Balance". A green arrow labeled "1. Select" points to the "Withdraw Money" use case. The "Design Panel" is open, showing the properties of the selected use case. The "Extremity 2 Arrow" property is highlighted with a yellow arrow labeled "3. Uncheck".

Property	Value
Extremity 1	Withdraw Money
Extremity 1 Arrow	<input checked="" type="checkbox"/>
Extremity 2	Refuse Withdraw
Extremity 2 Arrow	<input type="checkbox"/>
Identifier	F-5
Control	<input type="checkbox"/>
Frequency	<input type="checkbox"/>

Extremity 2 Arrow false
